

Stop Being Just a Photographer.

Start Being a CEO.

Whether you're building a team OR staying solo — this is how you build peace & system into your business.

I am PASSIONATE about this because I WISH someone had told me this when we started !

You Can't Scale or Have Freedom When Clients Still Text Your Personal Phone. PERIOD!

- Once you establish, If you're still the ONLY one answering every message...
- Your VA can't help because they can't see what's going on...
- Your business shuts down every time you need a break...

That's not sustainable — it is a job, not a business

The Business Owner You Want to Be

- Has a business that doesn't live inside their personal phone
- Can bring in a VA/Admin to handle all the time consuming requests as you grow
- Unplugs on weekends or vacation without anxiety
- Builds systems that are professional
- Builds freedom whether you are solo or scaling

This is about boundaries. Control. Clarity.

And it starts with separating your life from your line.

What You Get with OpenPhone

- One number for your biz — accessible by your VA/team members
- Auto-replies, call recording, call summaries, and after-hours control
- Keep client convos organized and searchable
- Port your number or get a new number
- Peace of mind when you finally unplug

I wish I knew this sooner, it is a necessity.

Start with the most basic plan, that is all you need as a solo - as you grow you can upgrade if you see fit.

[Click here to sign up for OpenPhone!](#)

(Yes, this is a referral code! I get a small kickback. No pressure — go direct if you want. Just don't wait on this one.)

You are building a business, not a job

P.S. My VA's made this flyer, how CUTE!
